PREFACE

The Scholarly Electronic Publishing Bibliography 2010 presents over 3,800 articles, books, and a limited number of other textual sources that are useful in understanding scholarly electronic publishing efforts on the Internet. The bibliography is selective. All included works are in English. The bibliography does not cover digital media works (such as MP3 files), e-mail messages, letters to the editor, presentation slides or transcripts, unpublished e-prints, or weblog postings. Most sources have been published from 1990 through 2010; however, a limited number of key sources published prior to 1990 are also included.

The bibliography includes links to many freely available versions of included works. Such links, even to publisher versions and versions in disciplinary archives and institutional repositories, are subject to change. URLs may alter without warning (and often without automatic forwarding) or they may disappear altogether. Inclusion of links to works on authors' personal websites is highly selective. Note that e-prints and published articles may not be identical.
