This selective bibliography presents over 3,800 articles, books, technical reports, and other scholarly textual sources. It covers a wide range of topics, such as digital copyright, digital libraries, digital preservation, digital repositories, e-books, e-journals, license agreements, metadata, and open access. Most sources were published from 1990 through October 2011. It includes the Scholarly Electronic Publishing Weblog, which was published from June 2001 through December 2013. It is available as a website and a website PDF with live links (240 pages). An archive of all versions of the bibliography is also available.

SEP [Scholarly Electronic Publishing Bibliography] is compiled with utter professionalism. It reminds me of the work of the best artisans who know not only every item that leaves their workshops, but each component used to create them—providing the ideal quality control. . . . The selection of items is impeccable. I have yet to find journal articles irrelevant to the scope of the bibliography. SEP could be used as a benchmark in evaluating abstracting/indexing databases that proudly claim to have coverage of electronic publishing, but do not come close to SEP. - Péter Jacsó ONLINE 27, no. 3 (2003): 73-76.

This bibliography portal demonstrates that citation lists continue to play a role in research, in spite of the availability of powerful Web and digital library search engines and the near-extinction of print bibliography publishing. Summing Up: Recommended. - J. A. Buczynski, Choice: Current Reviews for Academic Libraries 45, no. 1 (1997): 58.

Dedication

In memory of Paul Evan Peters (1947-1996), founding Executive Director of the Coalition for Networked Information, whose visionary leadership at the dawn of the Internet era fostered the development of scholarly electronic publishing.

**Appendix A. Related Bibliographies**

**Appendix B. About the Author**

Charles W. Bailey, Jr. is the publisher of Digital Scholarship. He has over 30 years of information and instructional technology experience, including 24 years of managerial experience in academic libraries. From 2004 to 2007, he was the Assistant Dean for Digital Library Planning and Development at the University of Houston Libraries. From 1987 to 2003, he served as Assistant Dean/Director for Systems at the University of Houston Libraries. Previously, he served as the head of the systems department at an academic medical library, a systems librarian at a research library, a technical writer at a bibliographic utility, and a media librarian at an academic media center.

Bailey has been an open access publisher for over 22 years. In 1989, Bailey established PACS-L, a mailing list about public-access computers in libraries, and *The Public-Access Computer Systems Review*, the first open access journal in the field of library and information science. He served as PACS-L Moderator until November 1991 and as Editor-in-Chief of *The Public-Access Computer Systems Review* until the end of 1996.

In 1992, he founded the PACS-P mailing list for announcing the publication of selected e-serials, and he moderated this list until 2007.

In 1996, he established the *Scholarly Electronic Publishing Bibliography* (*SEPB*), an open access book that has been updated 80 times.

In 2001, he added the *Scholarly Electronic Publishing Weblog*, which announces relevant new publications, to *SEPB*.

In 2001, he was selected as a team member of *Current Cites*, and he has subsequently been a frequent contributor of reviews to this monthly e-serial.

In 2005, Bailey established Digital Scholarship, which provides information and commentary about digital copyright, digital curation, digital repositories, open access, scholarly communication, and other digital information issues. Digital Scholarship's digital
publications are open access. Both print and digital publications are under versions of the Creative Commons Attribution-Noncommercial License. In 2005, he also established DigitalKoans, a weblog that covers the same topics as Digital Scholarship.

In 2010, Bailey was given a Best Content by an Individual Award by The Charleston Advisor. In 2003, he was named as one of Library Journal's "Movers & Shakers." In 1993, he was awarded the first LITA/Library Hi Tech Award For Outstanding Communication for Continuing Education in Library and Information Science.

Bailey has written over 30 papers about digital copyright, expert systems, institutional repositories, open access, scholarly communication, and other topics.

He has served on the editorial boards of Information Technology and Libraries, Library Software Review, and Reference Services Review.

He holds master's degrees in information and library science and instructional media and technology.
